

Make This Pop-Up Flying Man

Print out Sheets A & B on to a stiff paper such as index paper or 80# cover, available at paper or office supply stores.

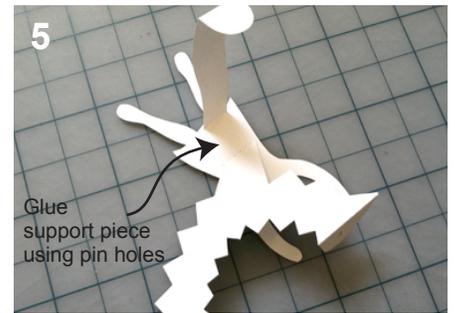

- 1 Loosely cut out both pop-up pieces from Sheet A.
- 2 Carefully cut out each piece on the solid printed lines. TIP: With scissors always cut into the corners NOT around them, this makes cutting much easier.
- 3 Pre-bend the pop-up support piece so that it looks like same as below.

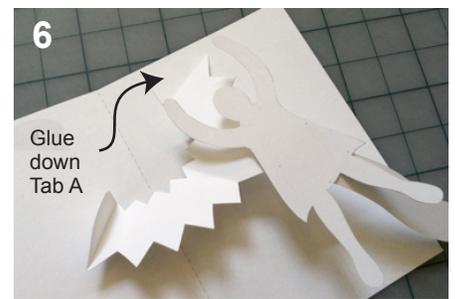

- 4 Prick holes with a push pin into the four dots on the Flying Man. Ouch!

- 5 FLIP OVER the Flying Man and glue the support piece to the back using the pin holes for positioning.

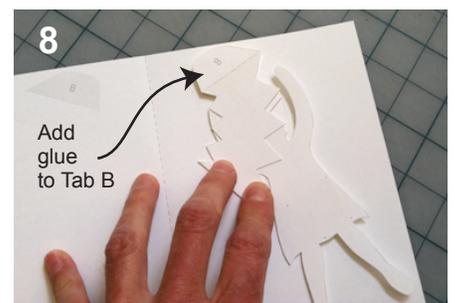

- 6 Glue Tab A to the background where indicated.

- 7 Now glue Tab D to the background where indicated.

- 8 Fold the other half of the pop-up support piece on top of the flying man.

- 9 Apply a little glue to Tab B and fold the background closed on top. Hold to set the glue.

Congratulations!

Your Flying Man is ready to take off!
