

Make This Pop-Up Potted Plant

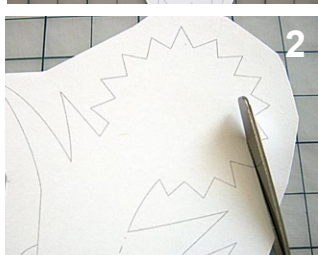

Print out Sheets A & B on to a stiff paper such as index paper or 80# cover available at paper or office supply stores.

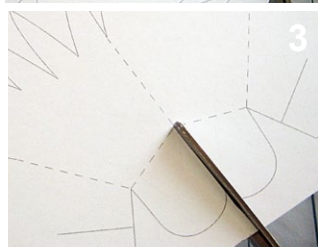

- 1 Loosely cut out both pop-up pieces from Sheet A .

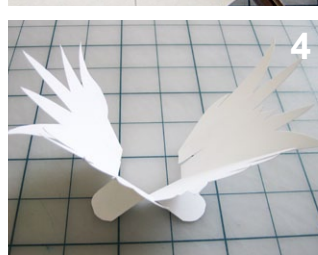

- 2 Carefully cut out the pieces on the solid printed lines.
TIP: Always cut into the corners NOT around them, this makes it much easier.

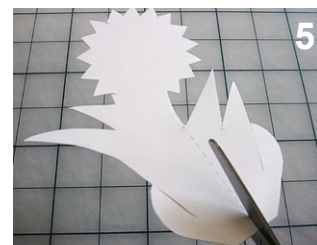

- 3 Make sure that you make the cut between and around the glue tabs.

- 4 Loosen up the Leaves piece by folding it into a bowl shape. Fold back the glue tabs.

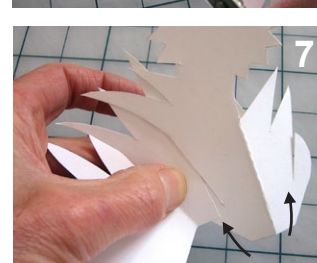

- 5 Make a small snip at the end of the crease line of the Flower piece to help fold it in half.

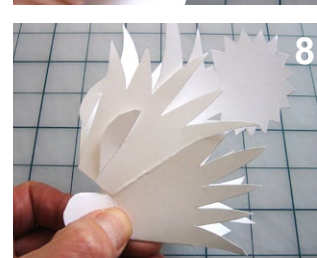

- 6 Make sure that you cut the slots in both the Flower and the Leaves pieces.

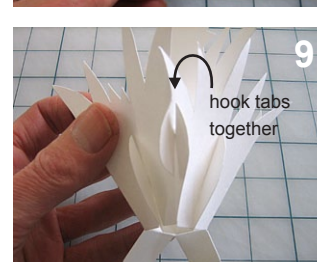

- 7 Fold the Flower piece in half and slot it into the Leaves piece. Slot in one side and then the other. The small hook tabs in the Leaves piece should be hidden by the Flower piece.

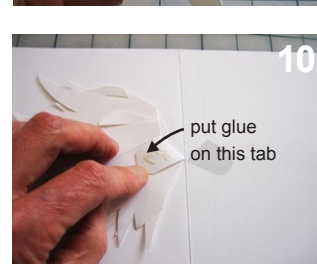

- 8 Flatten the whole assembly as shown.

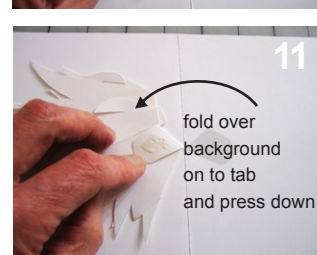

- 9 Hook the tabs of the Petal piece together and reposition the Flower if necessary.

- 10 Apply a little glue to one of the tabs and position on the background by matching to the shaded area.

- 11 Fold back the other glue tab and apply a little glue to it. Fold the other half of the background over on top of the glue tab and hold until the glue sets.

Congratulations!

Your plant is finished!
Open the card and admire!
